

eBike CHARGING STATION

The current excitement around eBikes has us amped! Our new eBike Charging Station is a public-use, universal eBike battery charging system that also provides secure, high-density bike storage. Designed to accommodate a wide range of personal eBike drive systems, each “charging dock” has a secure, user-accessible locker that contains a 120V/240V outlet for power access. Using their personal charger, users can safely store the charger inside the locker during charging. Want to support a fleet of bikes equipped with Bosch drive systems? The charging docks can come pre-installed with Bosch chargers eliminating the need for users to carry a personal charger with them.
